Inserting one or more Polish diacritics as well as other non GSM protocol standard characters (e.g.: ę, ó, ł, ś, ą, ż, ź, ć, ń, Ů, Û, Ä, Æ) will automatically shorten the maximum length of the SMS message (0-70 characters = 1 message, 71-134 characters = 2 messages, 135-201 characters = 3 messages). Messages with 'branding' have an option of controlling the 11-symbol sender field which allows for specifying the sender name. 'Priority' messages are messages with a guarantee to be sent within 3 minutes of being triggered. SMS messages are added up daily and presented as a sum of costs of messages sent out on a given day.
