 - b. If the Client changes the requirements many times, the Operator may increase the time necessary for execution of the task by a quantity adequate to the changes that were made.
 - c. If the Client does not maintain correspondence with the Operator in relation to matters important for execution of the task for more than 30 days, if the task is paid for on the basis of work-hours, the Operator has the right to close the task and charge an amount in proportion to time actually spent on the task. If the Client wants to execute the task again, the task will be executed on general terms. If the task is paid for as a complete task, the Operator has the right to regard the task as completed.
 - d. The agreed scope of work influences time required to execute the order. If the Client modifies the scope of work, the Operator has the right to change the value of the fee and the deadline for completion of the task, or not to execute the task. If the Client refuses to accept the changed price and deadline, the Operator shall complete the order on the basis of the original scope and schedule.
 - e. Deadlines for completion of tasks provided by the Operator are for information purposes only and cannot be subjects of complaints. If the planned deadline of completion of a task is considerably exceeded, the Client may withdraw from the order which shall not have any impact on other obligations which result from the Service.
 - f. If it is necessary to test and document any additional functionality, in particular applications created as a result of an order from the Client, time for testing and preparation of manuals or documentation shall be included in paid time of execution of the task.
2. Client is required to pre-approve the cost of all paid Additional tasks.
 - a. The Client may indicate persons who will be authorized to accept such tasks. Authorization to accept tasks means award of a special power of attorney by the Client. The power of attorney may be withdrawn by a withdrawal of such authorization in the Administration Panel.
 - b. If the task is executed correctly and in accordance with the agreed scope, acceptance of the cost of execution of the task removes all possibilities of complaints related to the costs of task execution.
 - c. If execution of the task requires, in a justified way, a cost that is higher than the initially accepted cost, the Client shall accept the new, higher cost of execution. If the Client rejects the cost, the task's execution shall be suspended and only the fee which had been initially accepted shall be charged. A task with execution time that was impossible to estimate at the beginning because of untypical scope of work or unforeseen technical problems which appeared during execution of the task shall be regarded as a task with a justified higher cost. The Operator does not regard visible or hidden defects which result from incorrect execution of the task as a justified higher cost.
 - d. When evaluating the scope of work, the Operator provides time and cost estimation in good faith, considering known and foreseeable circumstances. The Operator is not responsible for an extension of task execution time and simultaneous increase of its cost, if the original scope of work was difficult to estimate because of very high complexity, innovativeness and uniqueness of the task. In such situation, the Operator may reduce the scope of the task in order to fit in the planned budget, e.g. by omitting less important but expensive details. If completing the task in its reduced form is not possible and the Client does not agree for payment of an additional cost, the Operator may resign from execution of the work and return the advanced payment received for the task to the Balance of the

Client.

3. If the Client, as part of the Service, uses the Individual Application mechanism in the Panel, then:
 - a. These applications are made after the commission, according to specifications and under the supervision of the Client in the time & material model. This means that the application can not be secured against all possible situations, which results from the adjustment of the order scope to the designated budget, and possible further improvements would cause higher costs. The operator may indicate possible areas for improvement, but the final decision in this regard belongs to the Client.
 - b. Their implementation and use takes place with the exclusion of the Operator's liability.
 - c. The Operator is liable for any errors and damages up to the amount of the last task, which introduced a change to the Individual Application, and in the case of the first version to the value of the first task. At the same time, the Operator's liability does not include lost profits.
 - d. In particular, the Client is obliged to test the Individual Application in the panel in terms of data security and compliance with the legal requirements, also in the context of the GDPR.
 - e. The risk and responsibility for lost or damaged data as a result of malfunctioning of the Individual Application in the panel is borne by the Client, whose responsibilities include designing, implementation and maintenance of the Individual Application in the panel ensuring a high level of security..
 - f. If the Operator determines beyond reasonable doubt that the individual application in the panel works to the detriment of one or more Clients, for example due to faulty security and the risk of loss or destruction of the Client's data or due to a very large infrastructure load, the Operator has the right to disable such application and at the same time notify the Client about the reasons for this behavior.
4. The Operator has the right to place a text or a graphic with information on the logotype and the name of the Service, in the Shop Template and on auctions made with the use of the Service. It shall be presented as a balanced and unobtrusive static text or a graphic with a reference to the Operator's website. Additionally, the Operator may include the name of the Service on the documents and files generated by the Service
 - a. The Operator has the right to refuse, without justification, any request to change or replace such element, if it is a standard element.
 - b. The Operator allows hiding such elements by purchasing the 'White Label' service, charged in accordance with the Price list.
 - c. If at least one such element is hidden, removed or changed by the Client in the process editing the Shop Template, the Operator may charge back for this period as if the Client purchased the "White-Label" service.

§ 11 – Detailed conditions for third party services

1. If the Operator integrates the Service with services of Third Parties, he determines the scope of functionality and may modify the scope of the integration.
 - a. The Operator shall inform the Client of any changes to functionality of the integration module as early as possible.
 - b. The Operator is not obliged to inform the Client of changes earlier than one Settlement Period before they take place.
 - c. In justified cases, e.g. when the service of a Third Party is modified, it is possible to make changes within the integration module without earlier notification.
2. The Operator has the right to organize integration with services of Third parties in the way which will allow transfer of payment for use of their services. If the Operator charged a payment for the use of a service of a Third Party:

- a. The Operator shall make settlement with the provider of an integrated service personally.
 - b. The fee that has been charged satisfies all costs of use of the service and the Operator personally settles such costs with the provider.
 - c. The fee that has been charged is visible in the Balance and is included in the invoice on general terms.
3. Client uses integrated services of Third Parties at their own risk, in particular Client:
 - a. should contact the Third Party before the integration is enabled, unless information provided on the Third Party's website states otherwise.
 - b. should always check whether the course of the integration was correct.
 - c. In the event of a breakdown should provide the Operator with all information necessary for verification, including data saved on a disk or transferred, where possible.

§ 12 – Detailed conditions of contractual works

1. Contractual Works are ordered by the Client through the CSC, in the form of a message, the content of which shows an unambiguous confirmation of the contracting order and acceptance of the frequency and cost, in which the Client also indicates: scope of works, guidelines for their implementation, and determination of priorities.
2. After receiving the message indicated in section 1 the Operator assigns a WDC Specialist to the Client who is responsible for the performance of contract work for a given cycle.
3. The frequency of Contract Work is defined as a fixed day or days of the week, in a cycle of one week, two weeks or four weeks.
4. The day before the agreed contract date, the WDC specialist will provide the Client with the scope of work for the contract date, containing the Client's guidelines sent so far and the proposed sequence of their implementation. The Specialist will also inform Client about the approximate time of starting work on the contract day, which will constitute the work plan. The Client submits their comments to the schedule before the beginning of the contract day. Lack of Client's comments to the sent work plan means acceptance of this plan.
5. The Operator reserves that some tasks may not be possible to perform only by modifying the template. These are in particular configuration issues in the panel or programming (system modifications). If possible, the WDC Specialist will inform the Client about it and help with reporting them to the appropriate department. Where possible, the WDC Specialist can suggest workarounds, informing you of their shortcomings and limitations.
6. The Operator enables the Client to contact a WDC Specialist during Contract Work. The contact takes place via the link contained in the message referred to in section 4.
7. If any issue has not been clarified before the contractual date, the Operator will try to get a response from the Client. Therefore, it is recommended that the Client monitor the message from section 4 and answered any questions as quickly as possible. If the Client does not provide an answer, the WDC Specialist will make a decision either to perform one of the backup tasks or based on his own experience, assuming the criterion of maximizing sales made by the Client in the Online Shop.
8. Lack of contact of the WDC specialist with the Client on the contract day, which prevents further work or not assigning other work for a given contract day, will result in the hours allocated to contract work being lost without the possibility of their return or make up at another date.
9. The minimum period for which a contract for Contract Works is concluded is at least 2 months. After 2 months, the Client or the Operator has the right to terminate with one month's notice. The termination of a contract for Contract Work must be submitted in the form of a Ticket.
10. It is not possible to reduce or increase the number of contract days, change the cycle of their execution, move the unused time or change the WDC Specialist. If the Operator does not confirm this, each change must be preceded by the termination of the existing contract and the conclusion of a new one, according to the new frequency of Contract Works.

11. If the Operator is not able to ensure the presence of a given WDC specialist or their replacement on a specified contract day - the fee for Contract Work to be charged will be refunded and the next contract day will be performed in accordance with the contracted cycle.
12. After the end of the contract day, the WDC Specialist will send the Client, in the message referred to in section 4, a summary of the changes made, including the time spent on each point of the plan.
13. The Operator provides a warranty for the performed Contract Works. The warranty shall be governed by the provisions as for the Time & Material service works specified in § 15. In the event of justified objections to the quality of the works performed due to an error in the art or excessive time, the Operator will refund the part of the fee proportionate to the given contract day. Due to the contracting of the WDC Specialist on other days, the possibility of correcting the error will appear only on the next contract day. The exception are errors affecting Key Store functionalities, which will be removed immediately.
14. The Operator reserves that the changes introduced as part of the Contract Works may be made "incrementally", i.e. the first version provided by a WDC Specialist will function as MVP (Minimum Value Product) and may, for example, be incompatible with all browsers. Such a state of affairs is not a mistake and if the Client deems that after a given iteration the effect of the work is not sufficient to publish it in the Online Shop, it may continue to improve on the next contractual day until the desired effect is achieved.

§ 13 – Responsibilities of the Operator

1. The Operator is responsible for damages caused to the Client by purposeful non-performance or undue performance of Services, up to the value of:

- 5.** The Operator is not responsible for any commissions charged by Third Parties, used by the Client which are not directly the Service, in particular commission for services integrated with the Service. The Operator is obliged to provide suitable information which will allow recovery of the commission or the charge which was unjustly charged by a Third Party.
- 6.** The Operator is not obliged to train the Client on the use of the Service.

- 9.** The Operator declares that when designing Shop Templates or trademarks no existing Third Party websites or trademarks are copied. Nevertheless, the Operator points out that no research related to infringement of interests of Third Parties is carried out, including registered or unregistered trademarks which the Operator might infringe during execution of the order, in particular:
 - a.** The Operator purchases licenses for photos and fonts (i.e. stock graphics) by purchase of a license for fields of exploitation in accordance with the order. If Client choose to use the materials in other areas,

they should purchase respective licenses on their own.

- 1. Damages borne by the Client for which the Operator may be responsible on the basis of the above provisions do not include damages caused by loss of chance by the Client.
- 2. The log book of the task must comprise of the first name and the surname of the employee of the Operator who performs the task, precise time of the commencement of particular activities, time of completion, the number of time units of work and a short description of activities that were performed. The sum of time spent on execution of the task is equal to the sum of duration of particular activities. The Operator has the right to add to the time of execution of the task time necessary for personal or phone conversations with the Client, search for photos, fonts or other files not provided by the Client, but necessary for the execution of tasks, as well as correction of texts with linguistic errors.
- 9. § 15 – Warranty for Service Work

1. The operator provides a guarantee for the performed Service works in accordance to the provisions of following paragraph.
2. The warranty period is 60 calendar days, counted from the day on which the Operator submitted, in the form of a Ticket, the complete results of work performed as part of the commissioned service work.
3. The warranty for Service works is independent of the Service Warranty. Problems arising as a result of Service works cannot be the reason for submitting the Service complaint, including e.g. its unavailability.
 - a. **The subject of the complaint may include**, in particular: incompatibility of the effect of work with their subject and purpose, incorrect display in browsers, unjustified execution of work, deviating from the guidelines or design, unjustified failure to perform work, as well as other errors, incompatibilities or problems.
 - b. The Operator is responsible for the accepted complaints up to the amount paid by the Client for the service works. The Operator's liability does not cover lost profits.
4. Complaints should be submitted in the form of a Ticket which should contain a detailed description of the subject of the complaint and all data that may contribute to the analysis of the problem. After receiving the Ticket with a complaint, the Operator will analyze it within 14 business days and notify the Client of its result in the Ticket. If the complaint is accepted, the Operator will also notify the Client about the form

- and date of its settlement.
5. The Operator reserves the right to refuse to make a substantive analysis of the complaint submitted after the warranty period expires or for other reasons manifestly unfounded. In this situation, the Operator will only notify the Client about the rejection of the complaint, limiting themselves to providing reasons as above.
 - a. If the Operator accepts the complaint, they reserve the right to make a unilateral decision whether the problem being the subject of the complaint will be removed free of charge or the Client will receive the refund of remuneration for the service works, while restoring the status before the order.
 - b. In the event of a repair being taken to rectify the problem, the Operator shall carry out this work as a priority. Priority execution means the repair will be carried out before performing subsequent paid services for the Client or other Clients.
 - c. In justified cases, in particular such as: absence of the person responsible for handling the complaint, force majeure - the Operator will indicate a new deadline for removing the problem or may appoint another person to fix the problem.
 - d. In the event of a repair being carried out, the warranty period for these works is 30 days, counted from the date of submitting of the complete results to the Client in the form of a Ticket.
 - e. In the event of multiple repairs, the warranty period is calculated from the submission of the complete results of the work to the last repair.
 6. Matters not subject to complaint:
 - a. Functional restrictions resulting from objective restrictions in the execution of the order, which neither the Client nor the Operator knew about with due diligence and which implementation would not have been possible to be carried out even by the most expert and experienced person from the Operator's team at that time.
 - b. Restrictions resulting from the general assumptions made regarding carrying out the works (e.g. problems with displaying in particular Internet browsers, intentionally omitted due to too low market share, below 1%).
 - c. Works carried out in accordance with the project, mockups approved by the Client, based on the development of an earlier version.
 - d.  - e. Problems caused by other programs, add-ons, disruptions, etc., the existence of which the Client did not inform in the order or about the existence of which, at the time of commencing work, the Operator had the right not to know.
 7. After the warranty period, the Operator assumes that the work has been carried out as expected by the Client and that they have accepted the work performed. At the same time, to acknowledge that the work has been accepted, no additional confirmation by the Client is required.
 - a. The Client acknowledges that the warranty period is established due to the rationalization of service costs, in particular due to the fact that after the warranty period, it is too expensive, problematic, and sometimes impossible, to determine the causes and source of the problem (caused e.g. by the impact of other modules, programs, changes), and accepts this fact when placing service orders.
 - b. The Operator has the right to refuse, without giving a reason, to analyze the source of the problem, regardless of the type of problem and the source of its occurrence. However, the Client can analyze and remove the problem placing a new order. Such an order should be made in the form of a new Ticket, indicating expectations as to the changes to be made to the Shop or Service, as a whole.
 8. The Operator declares that the performed service works are carried out in accordance with the best intentions, taking into account the arrangements with the Client, own experience, and in accordance with the art, taking into account the principles of scalability, security and possibilities of further development of functionality.

9. If the Client does not agree with the reason for rejecting the complaint, they should file a complaint on a general basis, indicating the number of the Ticket which they wish to make the complaint about. This complaint will be considered under the terms of § 14 of these Terms and Conditions by another person who will verify the assessment of the problem made by the person performing the service work.

§ 16 – Final provisions

1. Until these Terms and Conditions come into effect from the date provided, the previously published Terms and Conditions apply. These Terms and Conditions apply to all current Clients from the date provided, with the exception of new Clients who order and activate the Service during the period between these Terms and Conditions are published on the Operator's website and their effective date - in this case the new Terms and Conditions apply immediately.

3. All information provided by the Client to the Operator as suggestions related to improvements, or introduction of new functionality is voluntary, and unless the parties decide otherwise in separate agreements, its provision to the Operator means that the Client relinquishes their rights, licenses or other benefits produced as a result of exploitation of created improvements or new products.
4. All related disputes shall be settled by the civil court in Szczecin, Poland.
5. The Client is obliged not to infringe intellectual property rights of the Operator as part of the use of unique solutions available within the Service.
6. Should any part of these Terms and Conditions be invalid for any reason, it is to be replaced with a corresponding text, which is valid and equivalent to the intended meaning. The rest of the Terms and Conditions shall remain unaffected and valid.
