

Adding the IdoSell Booking widget or button

In order to add a button redirecting to the widget or to embed the widget on your website, go to the sidebar menu in your Wordpress panel and select "Appearance" >> "Widgets".

From the list of available Widgets, select “IdoSellBooking” and decide which widget area you want to choose.

After adding the widget to the chosen area, set it up by selecting suitable options. In the "Display" section, you can select whether you want to display the whole widget or just a button. If you decide on the widget, you can modify the default width settings in "IdoSell Booking widget width." Next option allows you to add "Text over a button / widget" or "Text under a button / widget." However, they are not required fields. If you choose to display a button, you can decide if you want to use a default text or create your own in the "Button text" section. In case of opting for your own text, you will be asked to enter the text in a suitable field. After adjusting the settings, click on the "Save" button.

BOOK ONLINE

Adding an IdoSell Booking button displayed on the edge of the browser window.

In order to add a button on the browser edge, select “Appearance” >> “Widgets” from the sidebar menu of your Wordpress panel.

From the list of available Widgets, select “IdoSell Booking button placed on the browser edge” and decide in which widget area it should appear.

In the widget settings window, you will be asked to configure visibility options. If you want to, you

can modify the text displayed on the button by selecting “own” in the “Button text” option and entering your text in the “Custom tex on a button” field. Next, choose the button position and decide if it should appear as a floating element.

After adjusting all the settings, click on the “Save” button.

 middle
 bottom

Floating element:
 yes
 no

[Delete](#) | [Close](#) Save

After completing all the steps, a “Book online” button will appear in the chosen space on the browser edge.

Adding a subpage with the widget as a new menu position

In order to display the whole widget on a new subpage, you need to select "Pages" >> "Add new" from the sidebar menu in your Wordpress panel.

Next, provide a title and content of the page, placing the following code - "[idosellbooking|widget/]" - in the position in which the widget should appear.

A screenshot of the WordPress admin dashboard. On the left, a sidebar lists various menu items: Dashboard, Posts, Media, Pages (which is highlighted in blue), All Pages, Add New, Comments, Appearance, and Plugins. The main content area has a title 'Add New Page' and a text input field containing 'Book online'. Below the input is a toolbar with icons for bold, italic, and other text styles. A red dashed box highlights the placeholder code '[idosellbooking|widget/]'.

Click on "Publish" to save and publish the new page.

A screenshot of the 'Publish' modal window. It contains four main options: 'Save Draft', 'Preview', 'Status: Draft' (with an 'Edit' link), 'Visibility: Public' (with an 'Edit' link), and 'Publish immediately' (with an 'Edit' link). At the bottom, there are two buttons: 'Move to Bin' and a large blue 'Publish' button.

Afterwards, select "Appearance" >> "Menus" from the sidebar menu.

Select the menu that you want to edit or create a new one. In order to add the subpage with your widget, pick the chosen page from the list of available positions in the “Page” section and click on “Add to Menu.”

A screenshot of the 'Pages' section in the WordPress menu editor. The sidebar on the left shows the same navigation as the previous image, with 'Appearance' selected. The main area is titled 'Pages' and contains a 'Most Recent' list. One item, 'Book online', has a checkbox next to it. Below the list are 'Select All' and 'Add to Menu' buttons. To the right, there's a sidebar with 'Menu Name' and 'Menu Structure' sections, which are partially visible. The 'Menu Structure' section includes 'Drag each item here' and a list starting with 'Zarezerv...'.

After completing all the steps, a new position redirecting the widget subpage will appear in the chosen menu.

Embedding the IdoSell Booking button into a post

In order to embed a button redirecting to the widget in a post, you need to enter the following code: "[idosellbooking|button][/idosellbooking]" in the place where you want to display the button. You can change the default text by entering your own in the space between the opening and closing tags, e.g. "[idosellbooking|button]your own text[/idosellbooking]".

Embedding the widget into a post

In order to embed the widget into a post, you need to include the following code "[idosellbooking|widget/]" in the place where you want to display the widget. You can change the widget width by adding in the indicated place - "[idosellbooking|widget|widget_width/]" - one of the 4 available width values: 980, 760, 690, 480, e.g. "[idosellbooking|widget|480/]."
