In such event the Client should contact the Third Party who provides integrated services for technical support.
 - j. The Operator has the right to refuse to provide technical support for any functionality of the Service which is marked as 'end of life', if such notice was present in the Service function for longer than 30 days.

17. If the Operator makes it possible to create Critical Tickets, he has the right to define in the Ticket system a closed, precise set of issues which can be reported this way. If the Client submits a Critical Ticket related to an issue outside the scope defined by the Operator, the Operator has the right to charge an additional fee for each notification of this type in accordance with the Price list and to examine the Ticket further in general way. The parties shall take care that each person to whom authorization is granted has an independent account in the Administration Panel which will allow for their identification by their first name and surname and they will keep the password they received secret. Authorization is withdrawn by the removal of an account from the Administration Panel.
19. The Client has the right to order Additional tasks to be performed by the Operator using the Administration Panel. The following rules shall apply during valuation, before execution of an order:
 - a. The price of a task depends on the number of hours necessary for its execution and is the multiplication of time and unit price listed in the Price list.

 - c. If the Client wants to execute the task again, the task will be executed on general terms. If the task is paid for as a complete task, the Operator has the right to regard the task as completed.
 - d. The agreed scope of work influences time required to execute the order. If the Client modifies the scope of work, the Operator has the right to change the value of the fee and the deadline for completion of the task, or not to execute the task. If the Client refuses to accept the changed price and deadline, the Operator shall complete the order on the basis of the original scope and schedule.

20. Clients are required to pre-approve the cost of all paid Additional tasks.

 - b. If the task is executed correctly and in accordance with the agreed scope, acceptance of the cost of execution of the task removes all possibilities of complaints related to the costs of task execution.
 - c. If execution of the task requires, in a justified way, a cost that is higher than the initially accepted cost, the Client shall accept the new, higher cost of execution. If the Client rejects the cost, the task's execution shall be suspended and only the fee which had been initially accepted shall be charged. A task with execution time that was impossible to estimate at the beginning because of untypical scope of work or unforeseen technical problems which appeared during execution of the task shall be regarded as a task with a justified higher cost. The Operator does not regard visible or hidden defects which result from incorrect execution of the task as a justified higher cost.
 - d. When evaluating the scope of work, the Operator provides time and cost estimation in good faith, considering known and foreseeable circumstances. The Operator is not responsible for an extension of time of execution of a task and simultaneous increase of its cost, if the original scope of work was difficult to estimate because of very high complexity, innovativeness and uniqueness of the task. In such situation, the Operator may reduce the scope of the task in order to fit in the planned budget, e.g. by omitting less important but expensive details. If completing the task in its reduced form is not possible and the Client does not agree for payment of an additional cost, the Operator may resign from execution of the work and return the advanced payment received for the task to the Balance of the Client.
21. If the Client, as part of the Service, uses the Individual Application mechanism in the Panel, then:
- a. These applications are made after the commission, according to specifications and under the supervision of the Client in the time & material model. This means that the application can not be secured against all possible situations, which results from the adjustment of the scope of the order to the designated budget, and possible further improvements would cause higher costs. The operator may indicate possible areas for improvement, but the final decision in this regard belongs to the Client.
 - b. Their implementation and use takes place with the exclusion of the Operator's liability.
 - c. The Operator is liable for any errors and damages up to the amount of the last task, which introduced a change to the Individual Application, and in the case of the first version to the value of the first task. At the same time, the Operator's liability does not include lost profits.
 - d. In particular, the Client is obliged to test the Individual Application in the panel in terms of data security and compliance with the legal requirements, also in the context of the GDPR.
 - e. The risk and responsibility for lost or damaged data as a result of malfunctioning of the Individual Application in the panel is borne by the Client, whose responsibilities include designing, implementation and maintenance of the Individual Application in the panel ensuring a high level of security and compliance with the Privacy by Design rules of GDPR.
 - f. If the Operator determines beyond reasonable doubt that the individual application in the panel works to the detriment of one or more Clients, for example due to faulty security and the risk of loss or destruction of the Client's data or due to a very large infrastructure load, the Operator has the right to disable such application and at the same time notify the Client about the reasons for this behavior.
22. The Operator has the right to place a text or a graphic with information on the logotype and the name of the Service, in the shop Template and on auctions made with the use of the Service. It shall be presented as

 - c. In justified cases, e.g. when the service of a Third Party is modified, it is possible to make changes within the integration module without earlier notification.
24. The Operator has the right to organize integration with services of Third parties in the way which will allow transfer of payment for use of their services. If the Operator charged a payment for the use of a service of a Third Party:
- a. The Operator shall make settlement with the provider of an integrated service personally.
 - b. The fee that has been charged satisfies all costs of use of the service and the Operator personally settles such costs with the provider.
 - c. The fee that has been charged is visible in the Balance and is included in the invoice on general terms.
25. Clients use integrated services of Third Parties at their own risk, in particular:
- a. They should contact the Third Party before the integration is enabled, unless information provided on the Third Party's website states otherwise.
 - b. They should always check whether the course of the integration was correct.
 - c. In the event of a breakdown they should provide the Operator with all information necessary for verification, including data saved on a disk or transferred, where possible.
26. In order to allow use of Affiliate Partner External Services (ES) in a similar way to use of the Service:
- a. In order to activate or deactivate ES, the Client or AP needs to submit a ticket to the Operator who, having their best interest in mind, enables and disables ES on behalf of the Client or AP. Enabling ES allows the AP to view the Client's balance (without the balance history) and charge it until the service is disabled by the Operator.
 - b. Payments for ES are taken directly from the Balance. Clients allow for debiting of the Balance by an Affiliate Partner during the period from the issuance of the permission until its revocation.
 - c. In order to make operations on the Balance possible, Clients agree for ES to debit their Balance and allows ES to inspect their Balance status without the right to access Balance history.
 - d. The scope of work is determined by ES and the Client is obliged to get acquainted with its description before the order.
 - e. The Operator provides communication with ES via Tickets. The Operator guarantees support in the process of arrangements with ES only in relation to issues submitted via Tickets.
 - f. The Client is not obliged to make any other payments for use of ES outside of the Balance.
 - g. Costs of use of ES are visible in the Balance and on the invoice from the Operator.
 - h. If ES requires that a contract should be signed, its transfer should be made by both parties in a form of

- a Ticket. A contract signed this way shall be honoured by ES, the Client and the Operator.
27. The Operator may proceed with activities restricting the Service functionality in order to secure a proper performance of the Key functions.
 - a. If the Server is overloaded, making it impossible to view the site or slowing it down considerably, the Operator has the right without a prior warning, to temporarily, automatically block of non-key functionality of the Service, in particular to temporarily limit API access or access of other functions which require a lot of processing power, so that the Service can handle tasks related to the operation of Key functions.
 - b. If the Client uses a shared server, the Operator may introduce limits of frequency in downloading and generating information, sending emails, etc. The limits are clearly defined on the Operator's website.
 28. Technical support packages include only help with the handling of available tools. The Operator may expect Additional tasks to be commissioned if the Client inquires about:
 - a. Checking and debugging of the Client's programs which use the Service's API, as well as giving detailed advice and training regarding the usage of the API, which exceeds the scope of documentation available on the Operator's website.
 - b. Checking and debugging HTML, JavaScript and CSS or validating translated texts, created and added by the Client, as add-ons to the Template designed by the Operator, or during the process of editing the Template's code by the Client.
 - c. API usage, including verification of the performance of programs used by the Client, designed by the Client or by a Third Party.
 - d. Outdated Supporting Applications, for which a new version has been available for over 90 days.
 29. If the Client inquired about urgent removal of an error, causing incorrect performance of the shop's Key functions, after the issue is resolved, the Operator may charge the Client if the error was caused by the Client. The charge is calculated as per the Additional task terms.
