- 2 The warranty for Service works is independent of the Service Warranty. Problems arising as a result of Service works cannot be the reason for submitting the Service complaint, including e.g. its unavailability.
 - 2.1 The subject of the complaint may include, in particular: incompatibility of the effect of work with their subject and purpose, incorrect display in browsers, unjustified execution of work, deviating from the guidelines or design, unjustified failure to perform work, as well as other errors, incompatibilities or problems.
 - 2.2 The Operator is liable for complaints up to the amount of remuneration paid by the Client for given service works. The Operator's responsibility does not include lost profits.
- 3 Complaints should be submitted in the form of a ticket which should contain a detailed description of the subject of the complaint and all data that may contribute to the analysis of the problem. After receiving the ticket with a complaint, the Operator will analyze it within 14 business days and notify the Client of its result in the ticket. If the complaint is accepted, the Operator will also notify the Client about the form and date of its settlement.
- 4 The Operator reserves the right to refuse to make a substantive analysis of the complaint submitted after the warranty period expires or for other reasons manifestly unfounded. In this situation, the Operator will only notify the Client of the rejection of the complaint, limiting himself to providing reasons as above.
 - 4.1 If the Operator accepts the complaint, they reserve the right to make a unilateral decision whether the problem being the subject of the complaint will be removed free of charge or the Client will receive the refund of remuneration for the service works, while restoring the status before the order.
 - 4.2 In the event of a repair being taken to rectify the problem, the Operator shall carry out this work as a priority. Priority execution means the repair will be carried out before performing subsequent paid services for the Client or other Clients.
 - 4.3 In justified cases, in particular such as: absence of the person responsible for handling the complaint, force majeure - the Operator will indicate a new deadline for removing the problem or may appoint another person to fix the problem.

 - 4.5 In the event of multiple repairs, the warranty period is calculated from the submission of the

complete results of the work to the last repair.

- 5 Matters not subject to complaint:
 - 5.1 Functional restrictions resulting from objective restrictions in the execution of the order, which neither the Client nor the Operator knew about with due diligence and which implementation would not have been possible to be carried out even by the most expert and experienced person from the Operator's team at that time.

 - 5.3 Works carried out in accordance with the project, mockups approved by the Client, based on the development of an earlier version.

 - 5.5 Problems caused by other programs, add-ons, disruptions, etc., the existence of which the Client did not inform in the order or about the existence of which, at the time of commencing work, the Operator had the right not to know.
- 6 After the warranty period, the Operator assumes that the work has been carried out as expected by the Client and that he has accepted the work performed. At the same time, to acknowledge that the work has been accepted, no additional confirmation by the Client is required.
 - 6.1 The Client acknowledges that the warranty period is established due to the rationalization of service costs, in particular due to the fact that after the warranty period, it is too expensive, problematic, and sometimes impossible, to determine the causes and source of the problem (caused e.g. by the impact of other modules, programs, changes), and accepts this fact when placing service orders.
 - 6.2 The Operator has the right to refuse, without giving a reason, to analyze the source of the problem, regardless of the type of problem and the source of its occurrence. However, the Client can analyse and remove the problem placing a new order. Such an order should be made in the form of a new Ticket, indicating expectations as to the changes to be made to the Client's website or the program, as a whole.
- 7 The Operator declares that the performed service works are carried out in accordance with the best intentions, taking into account the arrangements with the Client, own experience, and in accordance with the art, taking into account the principles of scalability, security and possibilities of further development of functionality.
- 8 If the Client does not agree with the reason for rejecting the complaint, they should file a complaint on a general basis, indicating the number of the Ticket which they wish to make the complaint about. This complaint will be considered under the terms of § 10 of these Terms and Conditions by another person who will verify the assessment of the problem made by the person performing the service work.
